Career Objective

Passionate Front-End Developer with over one year of experience, seeking to leverage my expertise in React and Next.js at a forward-thinking software company. I am eager to join an environment that fosters learning and collaboration, where I can benefit from the mentorship of seasoned developers and contribute to innovative projects. Committed to professional growth and dedicated to contributing to the company's success, I aim to deliver high-quality, user-centered solutions and stay at the forefront of technology trends.

Professional Experience

Job Title: Web Developer and Assistant Manager (Remote), Jan 2023 to Present

Company: Tesseract Clothings Ltd.

Responsibilities:

- Developed responsive, user-centric websites using React and Next.js, with Tailwind CSS for efficient styling.
- Translated Figma UI/UX designs into functional web components, ensuring seamless visual transitions from concept to execution.
- Assisted in integrating and deploying scalable web solutions using AWS services (S3, Cognito, Lambda, DynamoDB, AWS Amplify), under the guidance of more experienced team members.
- Supervised a cross-functional team of developers and designers, reporting progress and challenges to the CEO and facilitating strategic decisions.

Skills

- **Expertise:** HTML5, CSS, Tailwind
- **Comfortable:** Bootstrap, Javascript, React, React Router
- **Familiar:** MongoDB, Node.js, Express.js, AWS, Next.js, typescript
- **Tools:** Git, VS Code, Netlify, Firebase, Chrome Dev Tools

Projects

Save the Planet Initiative | [Live Website Link](#)

Overview:

- Collaboratively developed an environmental advocacy platform using React, Next.js, Typescript, and Tailwind CSS to ensure a responsive and visually appealing design.
- Contributed to front-end development tasks, integrating various small libraries to enhance site functionality and aesthetics.
- Coordinated with a team to utilize AWS technologies such as S3, Cognito, Amazon WorkMail, and DynamoDB, with a focus on my involvement in the deployment and front-end integration aspects.

Tesseract Software and Technology | [Live Website Link](#)

Overview:

- Participated in the development of a corporate website for Tesseract Software and Technology using Next.js and Tailwind CSS, focusing on creating a modern, responsive design.
- Integrated AWS Cognito for secure user authentication and Amazon WorkMail for business email communications, enhancing site functionality and user experience.
- Utilized multiple small libraries to optimize site performance and aesthetics, ensuring a seamless user interface.

Budget Wheels | [Live Website Link](#) | [Github Client](#) | [Github server](#)

Overview:

- Product resale website with payment gateway.
- Admin, Buyer, and Seller have different dashboards with different features.
- Products can be added, deleted, sold, etc., depending on the type of users.

Technology Used: DaisyUI, React.js, React Router, Stripe, Node.js, Express.js, Firebase, MongoDB.
